About

Software Engineering and DevOps enthusiast pursuing a B.Tech in Artificial Intelligence and Data Science (Expected May 2027). Strong foundation in Java, Python, JavaScript, Data Structures, Algorithms, Linux, Git, Docker, and Cloud fundamentals. Hands-on experience building scalable web applications, REST APIs, and automation projects through internships, hackathons, and personal projects. Passionate about developing reliable software, automating deployments, and continuously learning modern technologies.

Skills

- **Programming Languages and Frameworks:** Java, Python, JavaScript, C++, Go, HTML5, CSS3, React.js, Node.js, Express.js, Flask, Spring Boot, Tailwind CSS, REST APIs
- **Tools and Technologies:** Linux, Git, GitHub, Docker, GitHub Actions, AWS (EC2, S3, IAM), MySQL, MongoDB, Nginx, Jenkins, Postman, VS Code, Jupyter Notebook

Experience

- **Infosys Internship** April 2025 – June 2025
Angular Web Development Intern [\[Certificate\]](#) Remote
 - Led **end-to-end development** of a scalable web application, building modular UI components and integrating **RESTful APIs** for seamless frontend-backend communication.
 - Optimized performance using **caching and efficient data handling**, reducing load time by **40%+** and cutting redundant server calls by **60%**.
 - Contributed to **80%+ of the codebase**, delivering clean, scalable solutions in an **Agile environment** with proper version control and best practices.

Projects

- **DevOps Cloud Automation Platform** Individual
Project Tech : Linux, Bash, Docker, Git, GitHub Actions, AWS, Nginx, CI/CD [\[🔗\]](#)
 - Developed a DevOps automation platform to streamline application setup, deployment, and infrastructure management using Linux shell scripting and Docker.
 - Implemented CI/CD pipelines with GitHub Actions, automating build, testing, and deployment workflows while improving development efficiency.
 - Designed reusable automation scripts for project provisioning, backup management, and cloud deployment, following DevOps best practices.
- **Microservice Task Management Platform** Individual
Project Tech : Java, Spring Boot, React.js, MySQL, Docker, REST API, JWT, AWS [\[🔗\]](#)
 - Developed a full-stack task management platform with secure REST APIs, role-based authentication, and responsive user interfaces using Spring Boot and React.
 - Designed scalable backend services with MySQL integration, implementing CRUD operations, API validation, and optimized database queries.
 - Containerized the application using Docker and integrated GitHub Actions for automated CI/CD deployment, ensuring reliable and efficient software delivery

Education

- **Dhirajlal Gandhi College of Technology** 2023 - Present
B.Tech. – Artificial Intelligence and Data Science Salem, India
 - CGPA: 8.0/10 (as of 6th semester)

Achievements & Certifications

- Earned certifications in Full Stack Development, Machine Learning, and Data Visualization, strengthening both technical and analytical skills.
- Participated in national-level hackathons, delivering innovative solutions under tight deadlines with strong teamwork.
